Hi Eric,

I'm not sure if David has responded but he's at an all-day retreat today. I believe we are all on board for next Tuesday's meeting with you and your staff. David will be back tomorrow and can confirm. Thanks,

Emmanuelle

**Subject:** IHS and EPA DW and CWA Team Meeting

Hi David,

We will be able to attend and will be making travel arrangements this morning. Please confirm your tribal DW team, Gail and Nancy will be available on November 8 as denoted below. At the bottom of this string I included the draft agenda we developed some time ago. HIS attendees would be James Carter and Jesse DeCoteau from EADO, Ken Fitzgerald from WADO, Dan Wallis from EADO, and myself.

Eric

**Subject:** RE: HAMP meeting

Hi Eric,

I've confirmed with my tribal DW team and with Gail and Nancy in CW section that Nov. 8 would work for us. I've blocked out 11am-4:30pm that day. Please let me know if that will work for meetings here in SF and we can pull together an agenda with specific topics and timeframes.

Thanks,  
David

1. IA closeouts:

- a. Who has replaced Helen McKinley and her role with IAs covering technical assistance/O&M related services (ex. Services by John Hamilton and Dan Wallis)? I will address IA closeout letters to this individual and engage them in discussions regarding IA extensions/funding as necessary.
- b. IA closeouts/extensions per attached lists which were shared with Emmanuelle and Nancy earlier this month.
- c. UFMS Reporting and EPA Finance Concerns
2. Status of ITCA contract efforts.
3. Collaboration on Safe Drinking Water Act proposals requiring tribal contributions when per cap water usage exceeds 150 gpcd.
  - a. How calculated. Is it total res-wide production divided by population or should commercial usage be deducted from the equation or should the gpcd be calculated for distinct PWSs within a reservation, etc. Andrew also indicated that the 150 gpcd values is mostly arbitrary with respect to its derivation. Thus, when you meet with David Albright and other R9 personnel it would be helpful to seek clarification, perhaps in the form of a written guideline that defines the 150 gpcd policy, from the USEPA.
4. EPA Administrative Orders/Enforcement:
  - a. Roles for EPA Enforcement, EPA Program Officers, and IHS. Phoenix Area IHS philosophy.
  - b. Battle Mountain: Appearance of ambiguous EPA Enforcement positions.
  - c. Hopi Arsenic Mitigation Project status, EPA enforcement activities, and continued EPA SDWA funding with limited Tribal/Village HAMP progress.
  - d. San Carlos Order-On-Consent and recent fecal coliform hits. EPA/IHS collaboration on Level 1 and Level 2 Revised Total Coliform Rule surveys.
  5. Hopi Arsenic Mitigation Project (HAMP) status and EPA enforcement activities.
  6. Closeout on drought efforts.
  7. Review of recent Safe Drinking Water Act proposals and methodology for review of proposed IHS fees.
  8. Technical Assistance Provider (TAP) collaboration.
  9. Potential for a meeting to discuss the above and any other topics of interest between EPA Region 9 and the Phoenix Area IHS. We have found past meetings (i.e. Michael's visits to the Phoenix Area, our meeting in San Francisco, the meeting in Sacramento) to be of value in that it helps to align and establish roles for our collective resources around items like SDWA proposals, drought response, etc. September/October is a good time for us.
